# Merchant Cash Advance

## Trouble Getting Investment Capital?

With the recent credit crunch, it may be tough for your business to get investment capital through traditional small business loans. First Data's Merchant Cash Advance program is the solution. We have approval rates of 85% and only require a single page application, need minimal documentation, and charge no application fees. You can even pre-qualify yourself online.

## What Could You Use Your Merchant Cash Advance For?

- Renovate
- Expand
- Develop a website
- Working capital
- Replenish inventory
- Upgrade equipment
- Advertise or run promotions
- Pay off other outstanding debt

## How Does It Work?

We qualify your business for an advance amount based on your average monthly Visa®/MasterCard® processing. Rather than make set payments on a monthly basis, you agree to have a small percentage of your daily credit card sales withheld to repay the cash advance. This percentage is automatically taken from your daily credit card processing settlements with First Data.

## Key Advantages

- Simple one page application with no fees
- Receive funds in as little as 3-5 days
- No fixed term or monthly payment
- Repay the advance as your business grows
- Opportunity to renew your cash advance for additional investment capital

First Data's Merchant Cash Advance program makes it easy to invest in your business using the money you're already making!

For more information or to get prequalified, visit us on the web at [firstdata.com/financing](http://firstdata.com/financing), contact your Business Consultant or call 855-229-1036.
